Japan Branch in Tokyo

Brazil Branch in Jaraguá do Sul

#### **FEATURES**

Enhanced safety thanks to dual-traction system

Steady operation for improved comfort

Insulated conductor rail, more suitable for higher tower

Lift operable even during tower erection stage

70% increase in height access efficiency for four persons

50% increase in cabin floor area for persons

## SPECIFICATION

Performance Data	
Model	H350
Rated load (kg)	350
Capacity (Persons)	3
Speed (m/min)	18/36
Motor (kW)	1.5 / 3 × 2
Power supply	400 V, 50 / 60 Hz, 3P+PE
Dimensions (mm)	1200 × 860 × 2820
Operating temperature	-30 °C ~ +60 °C
Certifications	CE

#### **PRODUCT DETAILS**

01 Rack and Pinion Ladder

As the carrier of the lift, the ladder is welded with standard rack and pinion and profiles.

02 Top Sensing Panel

When the lift comes in contact with an obstacle, the panel is compressed and a sensor is triggered.

03 Driving device

Drive the rack and pinion meshing transmission through the gear motor so that the service lift can descend or ascend towers.

04 Fall protection system

When the descending speed of the lift exceeds the preset speed of the fall arrester. It will lock automatically and its indicator in the control cabinet will light up to stop the lift. O5 Control Cabinet

As the control system of the lift, the control cabinet is

located inside the car.

06 Lower Escape Board

Located at the bottom of the lift, it can be opened inside or outside the car for escape or rescue.

17 Insulated Guide Rail Supply System

> It serves as the power supply of the lift, replacing the traditional cable.

**08** Upper Escape Board

Located at the top of the lift, it can be opened inside or outside the car for escape or rescue.
